Focus: Pricing Strategy

Output Image:

The screenshot shows the AI-Generated Insights & Content Automation interface. At the top, there's a navigation bar with 'n8n' and 'Wayfair_ContentAgent'. Below it are tabs for 'Overview', 'Chat (Beta)', and 'Editor' (which is selected). The main area features a complex workflow diagram with various nodes and connections. A large green box highlights a specific part of the diagram. Below the diagram, there's a 'Chat' section showing a session log and an 'Output' section displaying AI-generated insights. The 'Output' section includes code snippets and detailed descriptions of actions and their rationale.

What changed: More analytical framing

Input: bohemian rug, neutral tones, mid-price tier, competitive market, goal: create a cozy, elevated room feel while gently improving profitability

Version 2

```
{  
  "insights": [  
    "Position the neutral bohemian rug as a cozy, elevated centerpiece in the mid-price tier, emphasizing its timeless style and warm comfort.",  
    "Use gentle lifestyle messaging to highlight the rug's neutral tones and texture, helping customers imagine a more inviting and curated room.",  
    "Support profitability by framing the rug as a lasting investment in comfort and design, highlighting durable materials and long-term style value.",  
    "In a competitive market, stand out with curated room inspiration and styling tips that make the rug feel like a must-have piece, encouraging customers to choose quality over the cheapest option."  
  ]  
}
```

Focus: Lifestyle Tone

Output Image:

The screenshot shows the n8n workflow editor interface. At the top, there's a navigation bar with 'Personal' and 'Wayfair_ContentAgent' tabs, and buttons for 'Publish', 'Save', and '...'.

The main area displays a complex workflow diagram titled 'AI-Generated Insights & Content Automation - Project 4'. The diagram consists of various nodes connected by arrows, representing a process flow. Nodes include 'Get product data from Wayfair API', 'Generate content', 'Combine all outputs', and 'Send output to template'. The workflow involves multiple parallel paths and data transformations.

Below the diagram, there's a 'Chat' section showing a session with ID '84ab8...'. The input message is: 'bohemian rug, neutral tones, mid-price tier, competitive market, goal: create a cozy, elevated room feel while gently improving profitability'. The output message is: '{ "insights": ["Position the neutral bohemian rug as a cozy, elevated centerpiece in the mid-price tier, emphasizing its timeless style and warm comfort.", "Use gentle lifestyle messaging to highlight the rug's neutral tones and texture, helping customers imagine a more inviting and curated room.", "Support profitability by framing the rug as a lasting investment in comfort and design, highlighting durable materials and long-term style value.", "In a competitive market, stand out with curated room inspiration and styling tips that make the rug feel like a must-have piece, encouraging customers to choose quality over the cheapest option."] }'

The bottom left sidebar includes links for 'Templates', 'Insights', 'Help', and 'Settings'. A tooltip at the bottom left says: 'Type message, or press 'up' for prev one'.

What Changed: Softer, warmer

Input: bohemian rug, neutral tones, rising social media interest, competitive market, goal: build a cozy, elevated room vibe

Version 3

```
{  
  "insights": [  
    "In a moment where bohemian neutrals feel timeless rather than trendy, the story becomes one of enduring comfort—position these rugs as classic staples that customers return to year after year.",  
    "Without clear trend spikes, the market is signaling stability. Use this to reinforce a narrative of reliability, emphasizing quality, durability, and versatile style that fits any room.",  
    "To uncover hidden shifts, weave in micro-trend discovery: monitor social media styling, influencer room makeovers, and seasonal palette changes to spot emerging variations in bohemian aesthetics.",  
    "If trend signals remain quiet, focus on storytelling around lifestyle moments—cozy evenings, calm spaces, and curated interiors—to keep the category emotionally relevant while trends evolve."  
  ]  
}
```

Focus: Trend Editor

The screenshot shows the Wayfair Content Agent Trend Editor interface. At the top, there's a navigation bar with 'Overview' and 'Chat (Beta)' buttons, and tabs for 'Editor', 'Executions', and 'Evaluations'. A 'Publish' and 'Save' button are on the right. Below the tabs is a large workspace containing a complex workflow diagram with many nodes and connections. The diagram includes nodes for 'Get data from external source', 'Process data', 'Generate insights', and 'Publish to social media'. In the bottom left, there's a 'Chat' section with a session ID 'Session: 8ab8...' and a message input field: 'cozy evening room, neutral & cozy, elevated room vibe'. To the right of the chat is a 'Logs' section with a 'See HTML output here' button, which displays the JSON code for the generated insights. The logs also show a 'Success' status with a timestamp of '4ms'. The bottom right shows an 'Output' section with a single item listed.

What Changed: Insight- driven storytelling

Input: bohemian rug, neutral tones, wool, 8x10, low pile, goal: cozy living room

Version 4

```
{  
  "insights": [  
    "Highlight the soft wool texture and neutral bohemian pattern as a cozy, inviting foundation that makes a room feel warm and lived-in.",  
    "Tell a story about effortless comfort by emphasizing the low-pile design, making it ideal for everyday living, easy walking, and simple cleaning.",  
    "Use the 8x10 size as a key feature for defining living room zones, framing furniture, and creating a cozy seating area that feels intentionally designed.",  
    "Emphasize durability and long-term value, reassuring customers that this rug is built to withstand daily use while maintaining its style and softness."  
  ]  
}
```

Focus: Product Storyteller

Output Image:

The screenshot shows the Wayfair Content Agent interface. At the top, there's a navigation bar with 'Personal / Wayfair_ContentAgent' and 'Add tag' buttons, along with 'Publish', 'Save', and '...' buttons. Below the navigation is a sidebar with 'Overview' and 'Chat (Beta)' options. The main area is titled 'AI-Generated Insights & Content Automation - Project 4'. It displays a complex workflow diagram with various nodes and connections. A large green box highlights a specific part of the flow. At the bottom, there's a 'Chat' section showing a session ID 'Session: 84ab8...', logs indicating success, and an 'OUTPUT' section displaying the generated JSON code. The JSON code is as follows:

```
{ "insights": [ "Highlight the soft wool texture and neutral bohemian pattern as a foundational piece that instantly adds warmth and sophisticated comfort to any room.", "Emphasize the practical low-pile design, making it a perfect choice for high-traffic areas due to its easy care, smooth walking surface, and pet-friendly attributes.", "Showcase the generous 8x10 size as an ideal solution for defining living room zones, anchoring furniture arrangements, and creating a cohesive, well-proportioned space.", "Communicate the rug's durability and high-quality construction, reassuring customers of its long-lasting beauty and value as an investment in their home decor." ] }
```

What Changed: Feature- focused messaging
